

## **Allianz Deutschland AG Oddzial w Polsce**

### **Quantitative Analyst in (Graduates and Juniors)**

We are currently supporting development of start-up project for one of the biggest and most respected financial institutions in Europe!

Objective of the project is to set up advanced and high-end Analytics Center in Wroclaw serving as decision-making support for the top management and the relevant specialist areas and to meet several modelling requirements under Solvency II.

We are looking for ambitious and talented graduates and junior analysts who enjoy international environment and are driven by challenging tasks.

#### **Tasks:**

- Participation in maintaining and further develop the internal deterministic and stochastic corporate model for the calculation of solvency-, new business- and annual financial statement ratios
- Support determining the medium- and long-term development (local GAAP and IFRS) of important balance sheet and performance figures
- Support examining the future financial feasibility of policy holder participation,
- Participation in answering fundamental strategic questions
- Quantitative and statistical investigations

#### **Requirements:**

- Master's or PhD degree in mathematics, physics or related with proven track record
- Experience of working in financial institution would be a plus (ideally in actuarial or related)
- Very good analytical and conceptual skills to analyze complex technical issues independently and promptly and to prepare them for specific target groups.
- Very good English, German would be a plus
- Will to continuously extend your work knowledge, for example actuarial training or basic programming (Java, Python)

#### **Client offers:**

- Unique opportunity for professional development providing advanced and complex analysis using high-end tools and software
- Opportunity for international career and business travels
- Competitive salary together with yearly bonus
- Great working atmosphere based on constant development and mutual support
