

Global Research & Analytics

CRISIL
An S&P Global Company

CRISIL Global Research & Analytics is one of the world's leading analytics providers focused on high-end research and analytics services to the world's top financial institutions, including leading investment banks and asset management firms. Apart from Poland, we have research centers in India, China and Argentina providing regional and global research support to our clients across the globe.

In Wroclaw, Poland, CRISIL GR&A specializes in offering deep insights in equity and fixed-income markets through our research capabilities as well as supporting the global markets divisions of leading investment banks in risk analytics, which includes quantitative modeling, regulatory reporting, derivative valuations and risk technology. We enable our clients to enhance revenues, accelerate time-to-market and improve operational efficiencies.

Financial Research Analyst

The Analyst would join our financial research teams in one of the following domains: equity, fixed income, equity strategy or economics and support them in all tasks arising in the course of daily duties. In a longer perspective the employee would have the opportunity to work directly on behalf of one of our investment banking clients.

The Analyst would be particularly responsible for:

- Performing data search and aggregation related to the global economy, selected industries and/or companies for further analysis
- Tracking macroeconomic, sector and/or company announcements
- Writing up market commentaries and thematic research reports
- Designing quantitative and automation tools using Excel/VBA or other software
- Building and updating macroeconomic, financial forecast and valuation models

Who are we looking for:

- Bachelors or Masters degree in Economics/Finance/Capital Markets or any related financial discipline
- Basic/intermediate understanding of macroeconomics, financial markets and corporate finance with 0-3 years of professional work experience in a similar industry (e.g equity/credit/economic research)
- Highly motivated to start or continue professional career in financial research
- Fluency in English (written and spoken) is mandatory, very good knowledge of any other European language would be an additional value
- Proficiency in MS Office, particularly Excel (optionally VBA knowledge)
- Pursuing or willingness to pursue CFA certifications would be considered as an advantage

What careers @ CRISIL offers you

- Build an exceptional career experience by working on cutting edge analytics in the financial research domain
- As market leaders in the knowledge analytics space, work with the best analysts in the industry who come with outstanding academic and professional record
- Work culture that rewards learning and innovation with fast track career growth for top performing associates
- Compensation and benefits benchmarked above the best in the market and with added perks including medical insurance and Multisport membership
- Extensive training and development program
