SPACES OF S-COTYPE p $(0 \leq p \leq 2)$ AND p-STABLE MEASURES

Dang Hung Thang

Abstract: The aim of the paper is to give necessary and sufficient conditions for $\exp\{-||Ta||^p\}$ to be the characteristic functional of a Radon measure on E, where E is a Banach space with topological dual E', T-linear continuous operator from E' into L_p, and $0 \leq p \leq 2$.
